*Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-10,17-38 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,738,663.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are considered to be an obvious variant of the claims of the parent patent.

3. Claims 1-10,17-38 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,366,808.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the method claims of the '808 patent encompass the structure of the apparatus claims of the present application.

*Claim Rejections - 35 USC § 102*

4. Claims 17-26,32-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Herbst et al (6,021,347).

Herbst is considered to teach an apparatus that can perform all of the intended functions of the above claims. Further, the device could be implanted, if desired. There is no structural limitation in applicant's claims that requires only implantable operability.

*Claim Rejections - 35 USC § 103*

5. Claims 1-10,17-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herbst et al (6,021,347) in view of Habal (article titled 'Effect of applied dc current on experimental tumor growth in rats').

Habal shows an implantable unit, see figure 2. To make the device of Herbst implantable, (that is, hermetically sealed), would have been obvious in light of Habal since such would enable the treatment to be performed on the patient more conveniently and with less restriction on movement.

6. Claims 27-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herbst et al in view of Slovak (5,058,605).

Slovak teaches the use of DC pulses to treat human and animal tissue. To use pulses with the device of Herbst would have been obvious since such has been shown to be commonly used in human tissue stimulators.
